

One Stop Medical Center of Twin Cities Now Offering Convenient Online Registration for the Vasectomy and the Reversal Patients

Summary: In order to expedite patient registration and visits, One Stop Medical Center now provides convenient online registration.

Minneapolis, MN (August 2014) – When patients seek the vasectomy or vasectomy reversal procedures, they often face frustration related to lengthy check-in processes involving necessary but substantial paperwork. To ease this burden, One Stop Medical Center (OSMC) recently unveiled an online registration forms in its website, EZvasectomy.com that allows patients to conveniently prepare for their visits and office procedures in advance, using either their computers or their mobile devices.

There are many advantages to use the secure online registration. By using the online registration, the patients are required to review all information before they sign off. Therefore, the patients are completely informed after online registration. It will save time on the day of consultation and/or procedures. By registering in the privacy of patients' own homes or offices, the patients will not be distracted by other activity within doctor's office on the day of visit. The patients are able to give more accurate information because they may also have access to medical information (prior surgeries, medications, names of doctors) that they may not recall on the day of visit. Moreover, Doctors are able to review patients' history and to call them if there are any medical or social concerns before their office visits.

"When a patient registers online, we can expedite their visit to make it much more convenient and easy," Receptionist Amber said. "In fact, once they arrive, it's basically just a matter of verifying who they are in order to see the provider, since we already have most of the information needed in our system."

About One Stop Medical Center and Dr. Shu

One Stop Medical Center provides a wide range of office procedure services that emphasize minimal invasion and local anesthesia, including vasectomies and vasectomy reversals. It offers the most extensive range of state-of-the-art technologies with equipment serving every area of office surgical procedures.

Dr. Steven Shu, MD, MBA, is a board certified laser surgeon who specializes in office procedures. Dr. Shu was an assistant professor in the University of Minnesota medical school from 2006 to 2012, teaching no scalpel vasectomy and other office procedures.
